* You can find one of the largest selections of Photoshop tutorials (including video tutorials) at the web address `www.LearningPhotoshop.com`. * The American Society of Media Photographers has a great site

offering free online video tutorials, which also include usable tools and features, at the web address `www.PhotoshopClassroom.com`. * Adobe offers a free online tutorial, www.Adobe.com/Go/Access/Learn/PhotoshopTutorials.html, that offers a brief overview of Photoshop. # Graphic Design The following tables outline some of the more important features in the programs used in graphic design. Not every table lists every feature, because not every application

has every feature available. * **Photoshop (CS6):** Tired of being asked why your work looks so good, so I'm adding some more information to this chapter to explain what all those design tools do for you. You'll also find some key features highlighted in the left-hand box in Figure 17-1. The tools in Figure 17-1 are also available in the following versions: CS4, CS5, CS6, and CC. * **InDesign (CS6):** Similar to Illustrator, the tools and features listed in Figure

17-2 show what's available in the version shown. This chapter examines different aspects of the tools in Illustrator and Photoshop, but the scope is limited to what's available in those programs. Some features in the Adobe applications' creative suite are not covered in this chapter, such as the Adobe Web Workspace (described in Chapter 6), InDesign, Illustrator, and Photoshop. If you're an experienced graphic designer who uses any of

these applications every day, this chapter is for you. If you have never used any of these applications before, or if you're new to using these programs, a chapter such as this would be a good place to start. If you find yourself moving from program to program because one of them meets your needs better than the others, you may want to skip around and work through this chapter in that order.

John M. Glass John M. Glass was an author and editor. A native of Boston, Massachusetts, Glass worked at the Works Project Administration (WPA) on The Economic Survey of the Middle West (1940) and The Working Poor of New York City (1941). He was also a co-founder of the New American Library and was the publisher and editor of a number of magazines that appeared there, including

Campus and World Literature. He also was a longtime editor of the Liberty Quarterly and a former editor of Woodworker's Journal. Books The Economic Survey of the Middle West, published in 1942, is the first work on the impact of the war on American life and society and was based on a yearlong field trip taken by Glass, on behalf of the WPA, along Interstate 80 through Indiana, Illinois, Michigan, Wisconsin and Minnesota. Glass accompanied a group of

unemployed men during the trip, and used his WPA grant to pay for the trip and also to hire others to assist him in photographing and visiting approximately 1,300 businesses. His wife, Ruth Glass, wrote an article on the history of the "Textile Belt" in Indiana in The American Magazine, and in 1950 wrote an article, based on her research, that accompanied the efforts to salvage textiles from the pre-Civil War textile mills in Indiana. His 1943

book, The WPA in America: A Study in Administrative Ideology, was published by John Wiley & Sons and helped to broaden the study of public administration in the United States. In his book, The Industrial Revolution in New York City, Glass discussed the changes that occurred between 1850 and 1930 in the energy sources and product distribution in the city. He pointed out that more people moved into the city to work in industries where there were

fewer opportunities for steady employment. He noted that this was the case for people who worked for the railroads in New York City, where more work was available for less money, but less work for more money. He also pointed out that changes in the transportation system also had an impact on the delivery of New York City's products. He felt that people who were employed in industries that were expanding, such as the garment industry, for

example, lived in buildings with high rents. Another book, The Old Making of New York, published in 1952, was a history of the city from colonial times until the end of the 19th century. References External
